

SCAROSSO

SIZE GUIDE

PRINTING INSTRUCTIONS

The Scarosso size guide is supported by all operating systems and it can be printed easily. Make sure the printer is not adapted but 100% to scale. In order to check it, put a credit card on top of the paper at the bottom of the page 2 in the appropriate place.

HOW DO I FIND THE RIGHT SHOE SIZE?

Each and every Scarosso shoe is made from a different last.

This means that, different sizes may correspond to the same foot length in centimeters, depending on the model selected.

Even if you have already purchased Scarosso footwear, you may have to order a different shoe size for a different shoe model.

Before completing the purchase, we advise that you carefully follow the instructions provided here to correctly measure your foot. Compare the measurements with the size guide table on each product page on www.scarosso.com and choose the size that best suits you.

STEP-BY-STEP GUIDE TO TAKE THE CORRECT MEASUREMENT

1. On page 2 you will find the outline of a foot.
2. Wear socks or a pair of tights that you normally wear.
3. Place the sheet of paper on a flat surface and place your foot within the template, making sure the heel touches the dotted red line.
4. Remain standing while you take the measurement, if possible ask someone for help.
5. Mark on the template the longest part of the foot so that you can accurately check the corresponding centimeters.

We always recommend that you measure both feet and use the longest measurement as the reference.

FIND THE RIGHT SIZE FOR YOU

At this point you will have the exact measurements in centimetres for the foot length.

Check the size guide on the product you have selected and choose the size that suits you best: for every model you will have a reference grid at your disposal for the sizes and the corresponding length in cm.

If your foot length is between two sizes, choose the largest size.

Finally, for further help, on each product page you will find one of the following letters to give you an indication also on the width of the shoe.

A = model with narrow width

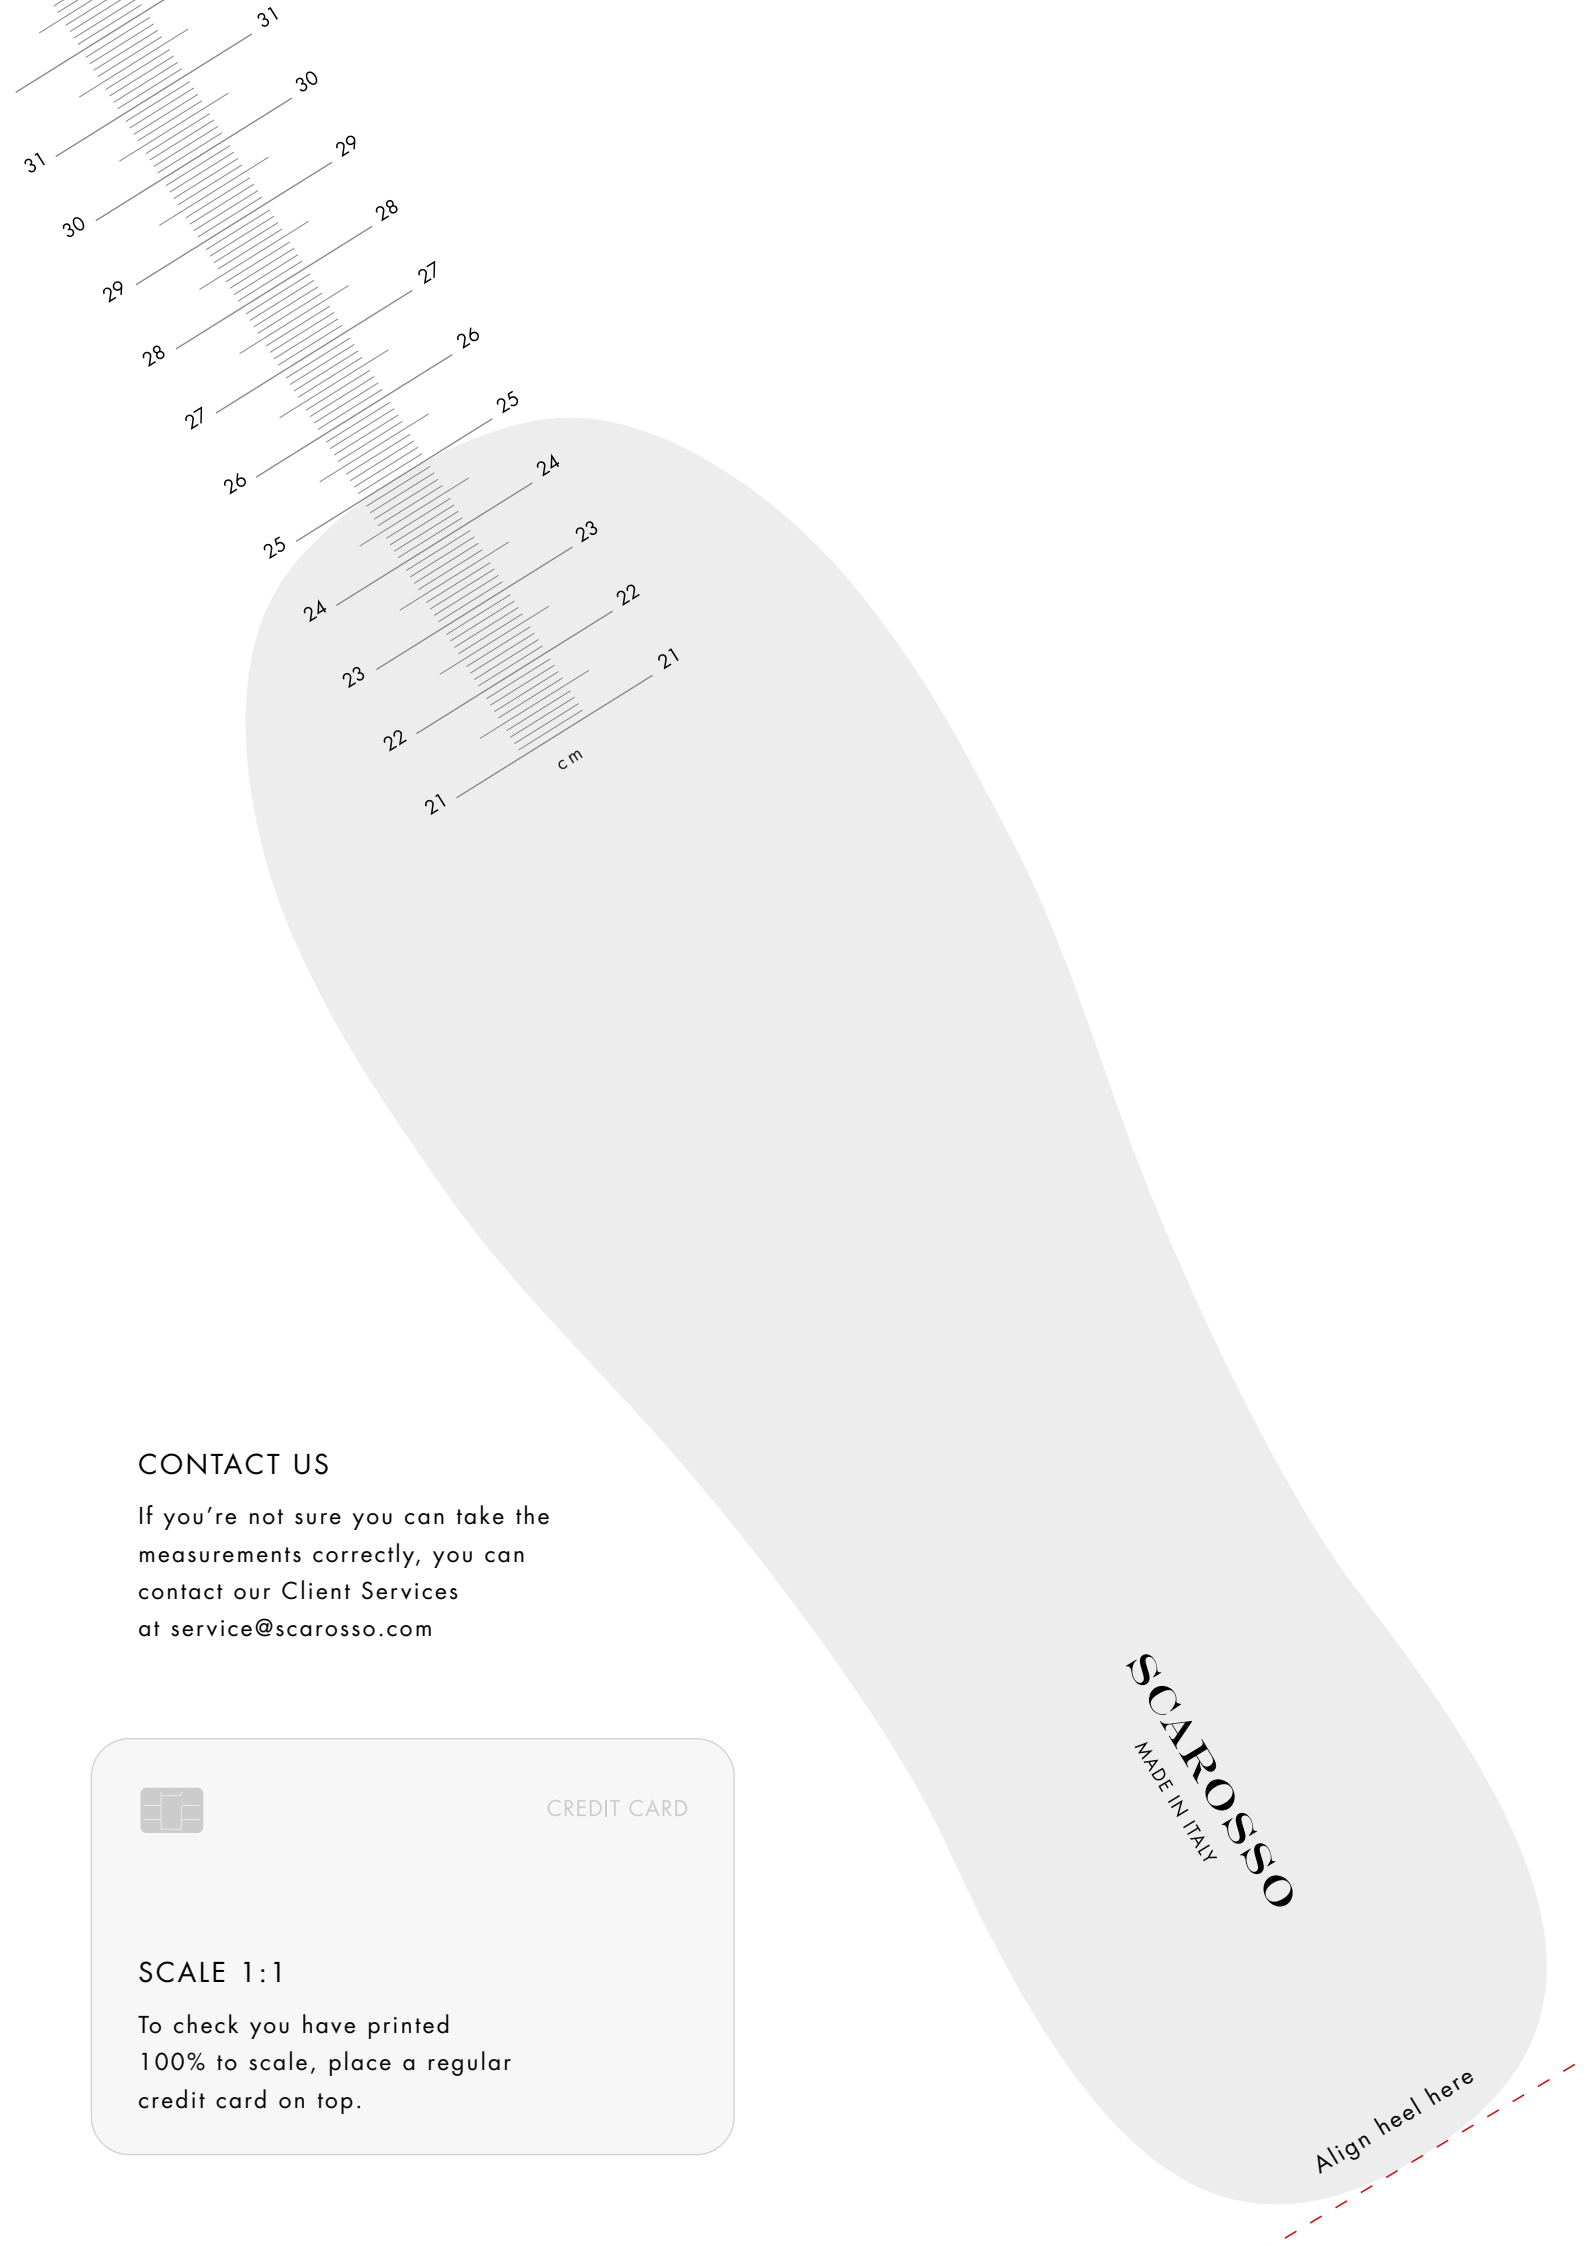

B = model with medium width

C = model with wide width

SCAROSSO AT YOUR DISPOSAL

Still unsure as to which size to choose? Our Client Services team will be happy to help you!

Send us your query via email to service@scarosso.com. Our team of experts will contact you within 24 working hours.
