

# SCAROSSO

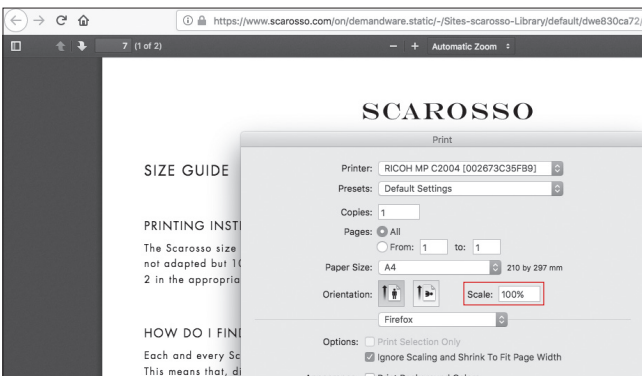

## SIZE GUIDE

## PRINTING INSTRUCTIONS

The Scarosso Size Guide is supported by all operating systems and it can be printed easily

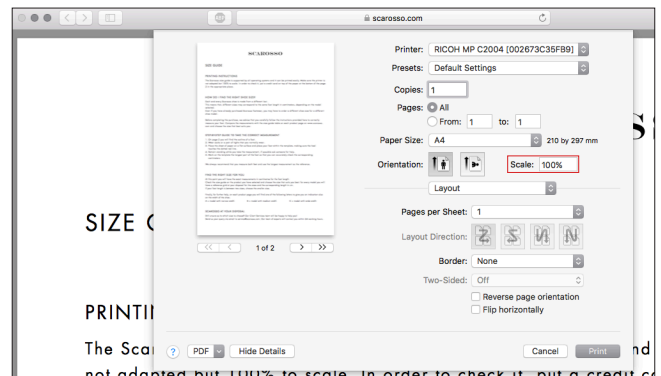

**Make sure the printer is not adapted but 100% to scale.**

## EXAMPLES

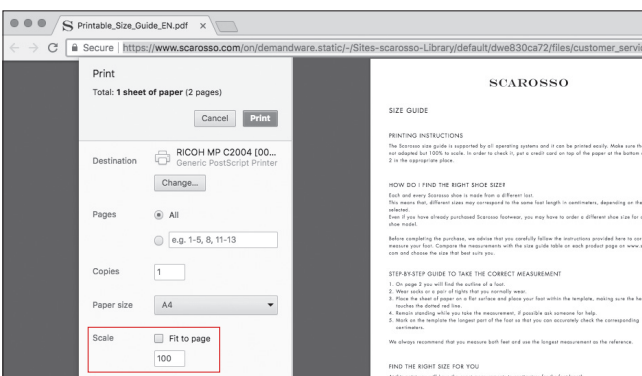

Internet Browser:  
**MOZILLA FIREFOX**

Set 100% in "Scale".

Internet Browser:  
**SAFARI**

Set 100% in "Scale".

Internet Browser:  
**GOOGLE CHROME**

Deselect "Fit to page"  
and set 100% in "Scale".

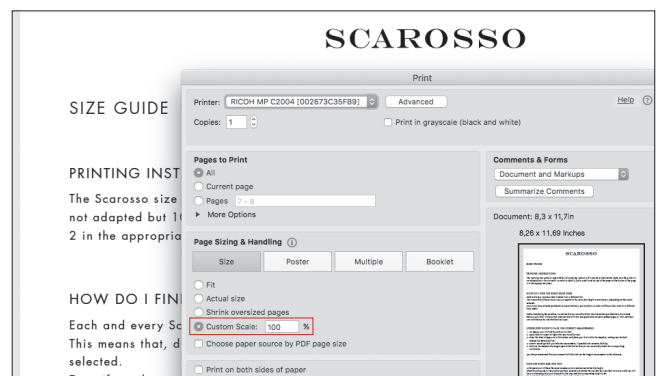

Image Reader:  
**ADOBE ACROBAT**

Select "Custom Scale" with 100%.

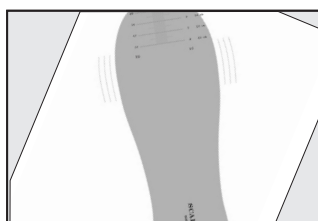

**In order to check it, put a credit card on top of the paper at the bottom of the page 3 in the appropriate place.**

## HOW DO I FIND THE RIGHT SHOE SIZE?

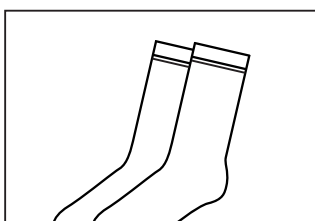

Scarosso shoes are made starting from various lasts. This means that, different sizes may correspond to the same foot length in centimetres, depending on the model selected. Even if you have already purchased Scarosso footwear, you may have to order a different shoe size for a different shoe model.

Before completing the purchase, we advice that you carefully follow the instructions provided below to correctly measure your foot.

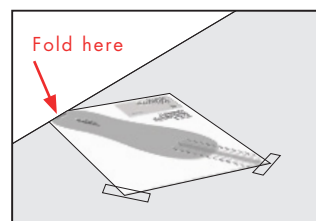

## STEP-BY-STEP GUIDE TO TAKE THE CORRECT MEASUREMENT

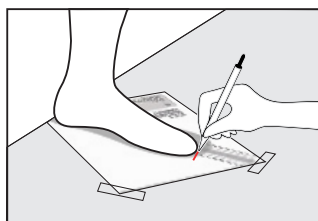

1. On page 3 you find the outline of a foot.

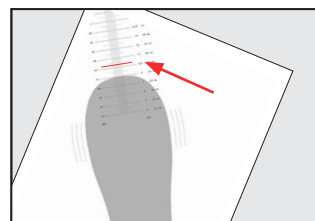

2. Wear socks or a pair of tights that you normally wear.

Fold the sheet in correspondence of the red dotted line, where it states "Please fold here". Place the sheet on a flat surface, making sure that the red dotted line adheres to a wall.

4. Place your foot within the outline, making sure the heel touches the red dotted line. Remain standing while you take the measurement, if possible ask someone to help.

5. Mark on the template the longest part of the foot so that you can then accurately check the corresponding centimetres on the product page.

We always recommend that you measure both feet and use the longest measurements as reference.

## FIND THE RIGHT SIZE FOR YOU

At this point you will have the exact measurements in centimetres for the foot length.

Check the size chart of the product you have selected and choose the size correspondent to your foot length. In the size chart you will find also one of the three letters which highlight the width of the last:

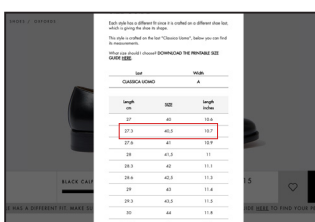

A = model with narrow width

B = model with medium width

C = model with wide width

1. On the product page click on Size Chart.

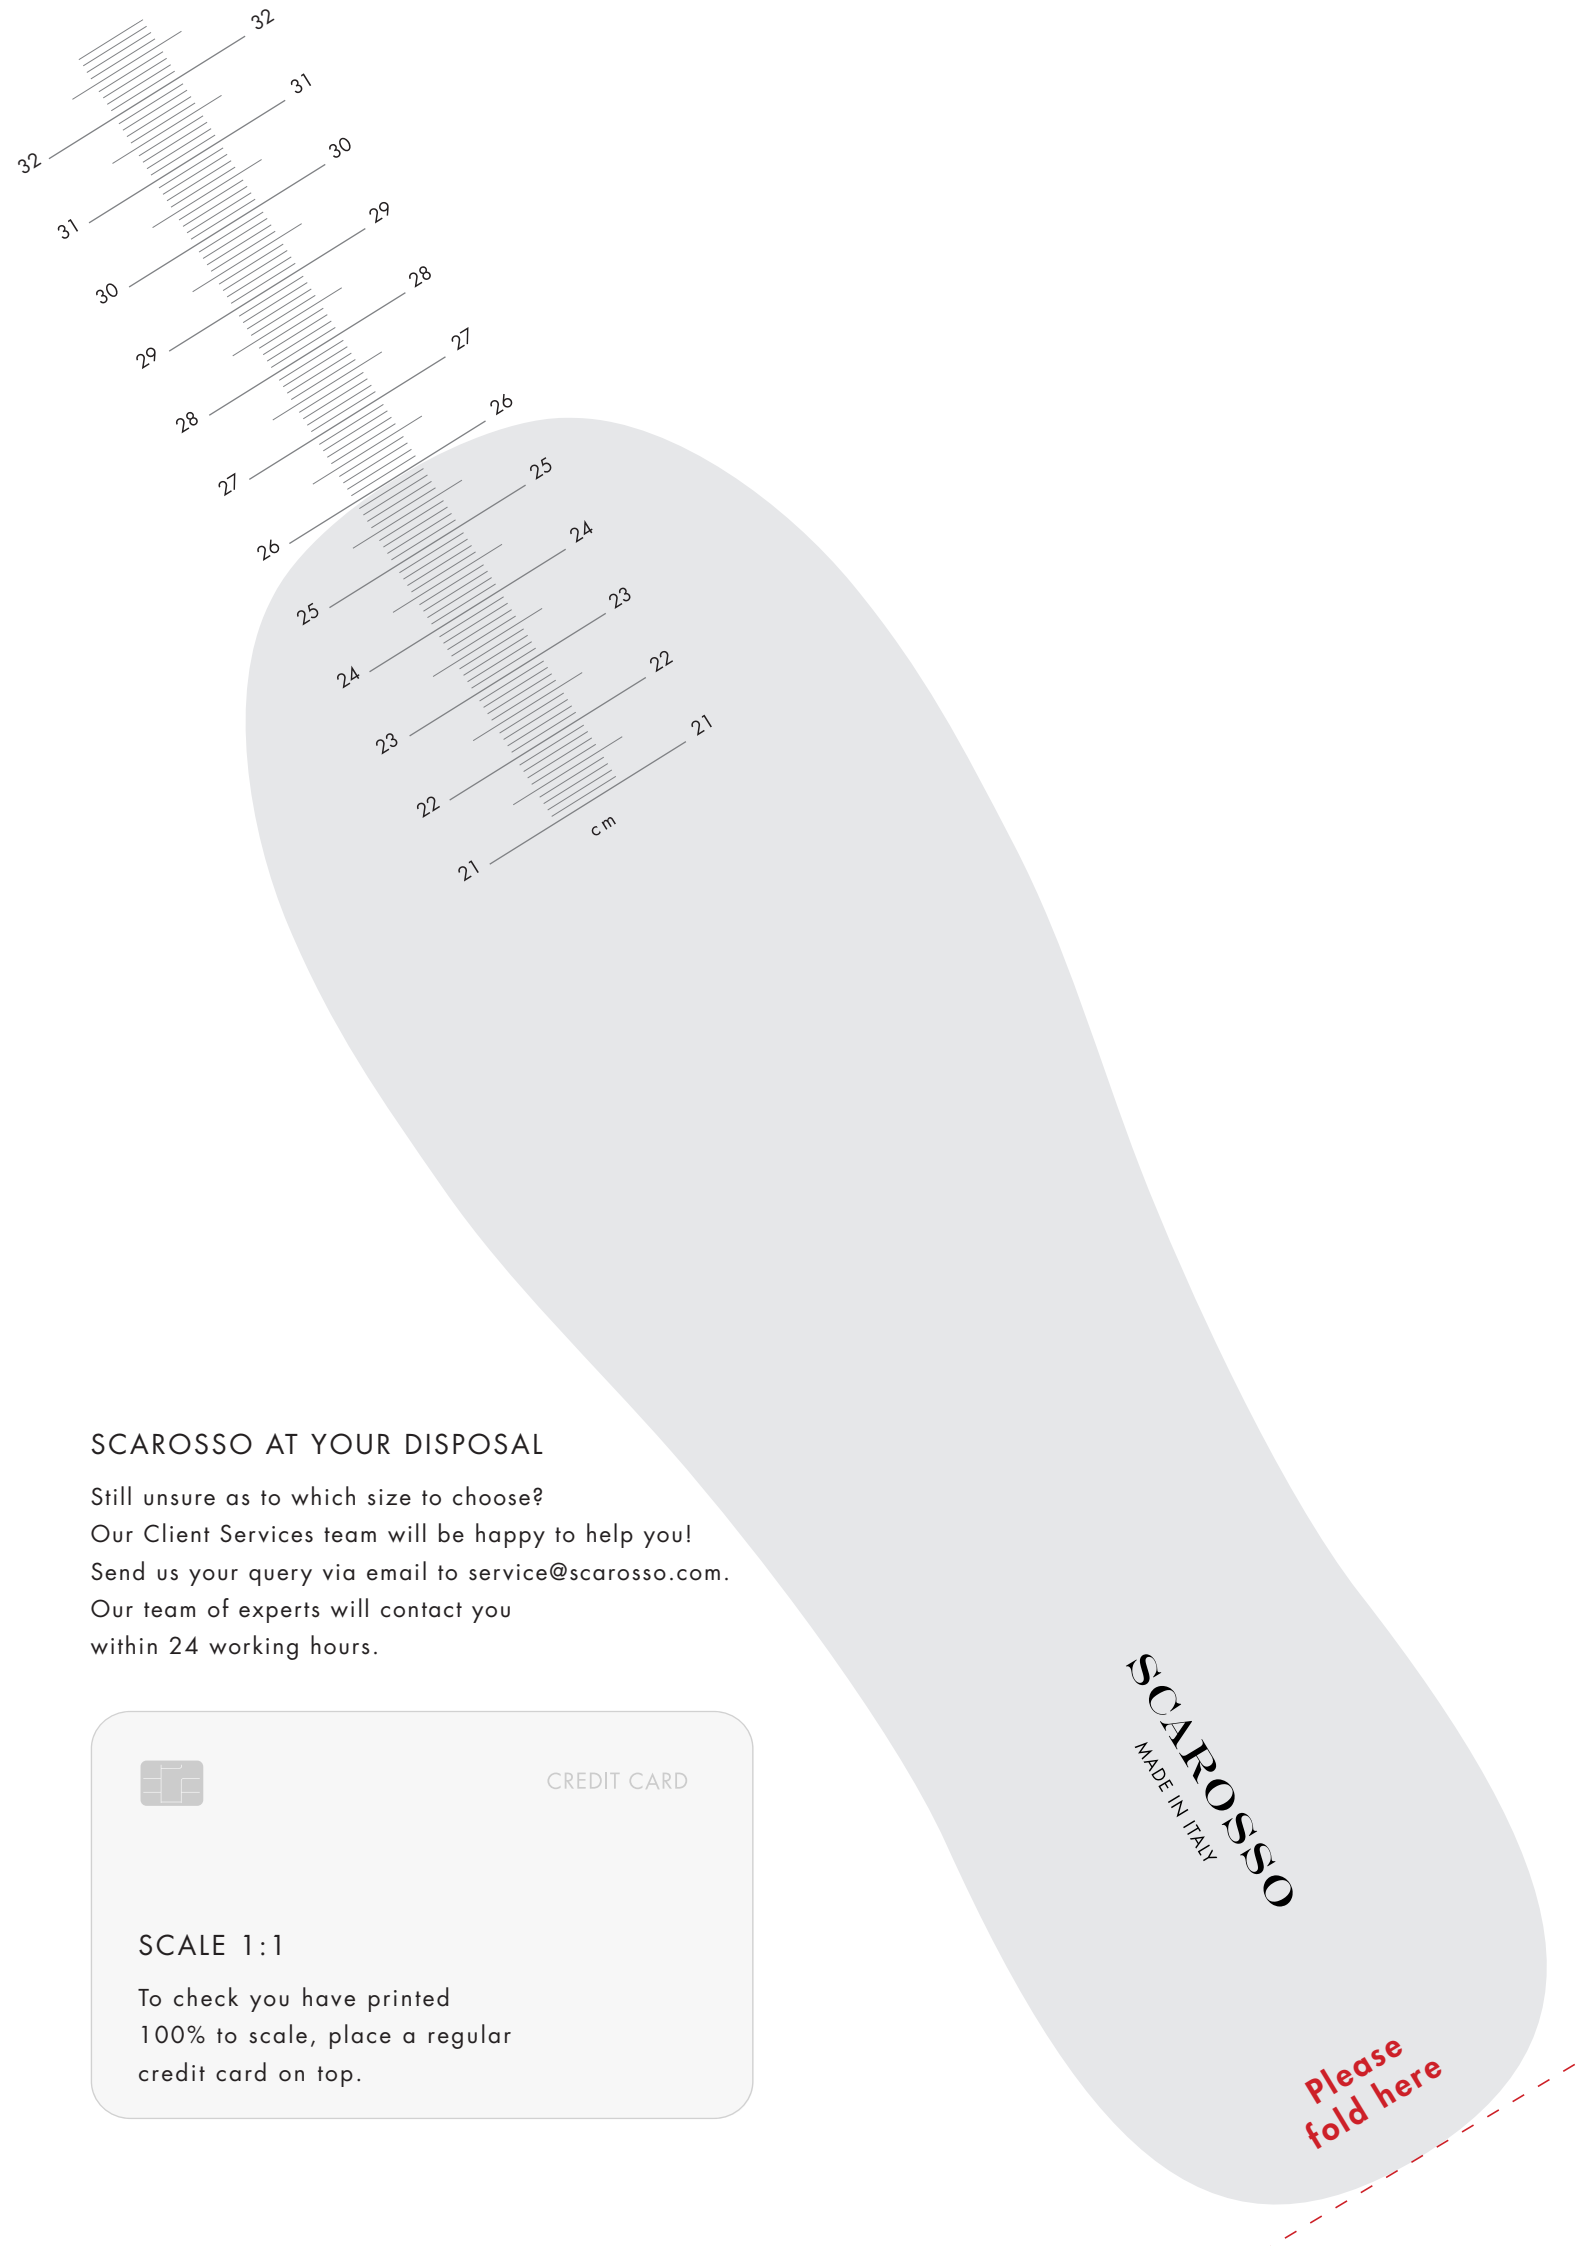

2. Find your foot length in the table.

3. Choose the corresponding size.

If your foot length falls between two sizes, please choose the smaller one.

## SCAROSSO AT YOUR DISPOSAL

Still unsure as to which size to choose?

Our Client Services team will be happy to help you!

Send us your query via email to [service@scarosso.com](mailto:service@scarosso.com).
